

Mr. Smith

## *2016 Standard Service Agreement*

This Service Plan is a great way to keep your system adjusted with the seasonal transition from spring to summer and from summer to fall. We have found that with a properly maintained system and correct controller programming, the water savings alone will cover the cost of the extra visits.

This Plan includes:

- **System Activation:** Charge mainline, inspect each zone and system for damage, adjust heads, program controller, perform a pressure test and advise you on any necessary repairs and improvements to the system.
- **Two Seasonal Visits:** We will cycle through each zone to ensure optimal coverage, make seasonal controller programming adjustments, and pressure test mainline.
- Deactivation of your system.
- Priority scheduling
- Warranty against freeze damage\*.
- 10% discount on parts.

\*Normal wear and extreme weather conditions not covered by warranty

\*Warranty void after November 15th.

**\$0.00 per year**
